Profile Summary

Passionate Front-end developer with exceptional problem-solving abilities, dedicated to crafting impactful and innovative solutions. Proficient in designing user-centric applications, seamlessly blending creativity and technical expertise. Possesses in-depth knowledge of diverse technology stacks, ensuring efficient and scalable product development. Ready to relocate with no objections to further career growth and opportunities.

Technical Skills

- **Programming Languages:** JavaScript, Python, HTML, CSS
- **Frameworks:** React, Express, Tailwind CSS
- Web Services
- Microservice Design
- Performance Optimization
- System Scalability

Core Competencies

- Agile Methodologies
- Software Development Life Cycle
- REST API
- Debugging and Log Analysis
- Containerization

Soft Skills

- Analytical
- Collaborator
- Leader
- Adaptable
- Communication

Academic Details

- **Bachelor of Technology (B.Tech.)** in Information Technology Parul University, Vadodara
CGPA: 7.38

Academic Projects

Kalakaar (June 2024 – December 2024)

Tools: HTML, CSS, JavaScript, Node.js, MongoDB, Express.js A comprehensive platform for artists to showcase their talents, find job opportunities, and connect with recruiters in a creative ecosystem.

Responsibilities:

- Designed an intuitive user interface using HTML, CSS, enabling artists to seamlessly create profiles and showcase their work.
- Developed the backend using Node.js and Express.js to manage job postings, user authentication, and artist-recruiter interactions.
- Integrated MongoDB for efficient data storage and management of user profiles, job listings, and communication records.
- Led the design and development of user authentication features, allowing artists and recruiters to securely sign up, log in, and manage profiles.
- Matched artists with job opportunities based on their skill set, portfolio, and preferences. GitHub Repository

PropVista (June 2024 – October 2024) Tools: React, Node.js, MongoDB, Express.js A scalable real estate platform that simplifies property search, listing, and management, enhancing the experience for buyers, sellers, and agents.

Responsibilities:

- Designed a user-friendly interface in React, allowing seamless navigation and a visually appealing property browsing experience.
- Developed a robust backend using Node.js and Express.js to manage user authentication, property listings, and search functionalities.
- Structured the database in MongoDB to efficiently store and retrieve property details, user profiles, and transaction histories. [GitHub Repository](#)

Campus Cravings (June 2023 – October 2023)

Tools: HTML, CSS, JavaScript, Node.js, MongoDB, Express.js A food delivery platform catering specifically to university campuses, offering convenient ordering, payment, and delivery services for students and faculty.

Responsibilities:

- Designed and implemented the user interface in React for students and faculty to easily browse and order food.
- Developed the backend with Node.js and Express.js to handle user management, orders, and payment processing.
- Integrated MongoDB to manage user data, order history, and food menus.
- Optimized the application for mobile devices, ensuring responsive and intuitive design.
- Collaborated with delivery partners to ensure smooth and timely deliveries to campus locations. [GitHub Repository](#)

Academic Achievements

- Developed Kalakaar, a platform for artists to showcase their talents and connect with recruiters, recognized as an innovative solution for creative professionals.
- Build PropVista, a scalable real estate platform, simplifying property listing and search for users.
- Enhanced the UI/UX of the college website by adding dedicated pages for Alumni and Faculty, improving accessibility and engagement.
